(Note 1): Oct 2010 onwards, being based on the defined criteria of the Japanese Business Establishments in India as (1) Head office, (2) Factory, and (3) Branches etc also regulate to include establishment without regular-basis Japanese staffs., it is observed a slight decline of Japanese Business Establishments in some areas.

(Note 2): In order to capture the business scenario of Japanese Companies in India more precisely, all the Business Establishments (except franchisee and dealer) irrespective of regular-basis Japanese staffs are taken into consideration Oct. 2013 onwards. Consequently, some areas show a significant increase in numbers.

(Note 3): The increase in the number of Japanese business establishments during the one year (October 2013 to October 2014) under the survey is very large, mainly due to the following reasons: In case where a Japanese company forms a JV with an Indian partner, the newly formed JV will also have the already established direct branch offices of that Indian partner, which will result in the immediate increase of the total number of business establishments. There are several such cases found during the survey, especially in insurance and transport sectors. There were also quite a number of Japanese business establishments which have not been captured in our previous surveys.

(Note 4): The number of establishments in Delhi and Haryana is mentioned separately for 2013, 2014 and 2015.

(Note 5): The number of Japanese companies and establishments in 2013 and 2014 has been revised at the time of survey for 2015.

(Note 6): Due to the outbreak of COVID-19, there were companies which were unable to answer the survey. Hence, the data of the mentioned companies in 2019 was complemented by using 2018's data or web-based information. The decrease in the number of Japanese establishments during the one year (October 2018 to October 2019) under the survey is very large while the number of companies increase, mainly due to reorganization, the companies which became exception for the survey by decrease of Japanese shares, etc. which surpassed the number of increased establishments by new companies.

(Note 7): In 2022, individual inquiries were made to companies that had not responded to this survey for multiple years in a row in the past, and some companies that did not respond were removed from the list. The increase in the number of Japanese business establishments during the one year (October 2021 to October 2022) under the survey is very large, mainly due to the new opening of establishments by already existing companies.
